This book deals with the current crises from a somewhat different the usual perspectives. It claims that causes and policy implications of these crises cannot be properly assessed by focusing on allocative efficiency or income growth alone; it requires a more general approach, based on social costs. It does not

This deterioration is indicated by the threats of unemployment, precarious working conditions and increasing income/status inequality, uneven geographical developments, and the exploitation and undermining of the institutional fabric of the society. It is aggravated by the rapid extension - at

So the global capitalist market economy is characterised by a great deal of instability and so-called true uncertainty, which largely undermine its coordinating and welfare-enhancing capacity. The view suggested by Karl William Kapp 's seminal evolutionary

The key actor in this process is business or, more specifically, it is the increasingly dominant, globalised, deregulated and disembedded hierarchical and power system of business enterprise.
