Pawlick's "The End of Food" reads more like an opinionated blog than a book. In fact, most of the research for content seems to have been done on the internet. If you already know the subject, it's just so-so for new information. But there are countless passages where the writing is just plain awful.

At the heart of The End of Food is a grim paradox: the rise of large-scale food production, though it generates more food more cheaply than at any time in history, has reached a point of dangerously diminishing returns. Our high-volume factory systems are creating new risks for food-borne illness, from E. coli to avian flu.
