Ethics in research are very important when you're going to conduct an experiment. Ethics should be applied on all stages of research, such as planning, conducting and evaluating a research project. The first thing to do before designing a study is to consider the potential cost and benefits of the research.

Rushworth Kidder states that "standard definitions of ethics have typically included such phrases as 'the science of the ideal human character' or 'the science of moral duty' ". Richard William Paul and Linda Elder define ethics as "a set of concepts and principles that guide us in determining what behavior helps or harms sentient creatures".
