This book is believed to be the first attempt to present an overview of all Christian activity in Tibet, throughout history. The Tibetan Plateau is mountainous, inaccessible, and vast - three times the land area of the United Kingdom, but with only one-tenth the population. Most Tibetans claim to be Buddhists, but for many Buddhism is a veneer over older, darker beliefs. The spiritual realm is a daily reality in Tibet.

An illustrated introduction to Tibet, designed to appeal to those who wish to see beyond the old and new myths to the kaleidoscope of images that co-exist in the daily life of the Land of Snows.

Each year, more than 3,000 Tibetans secretly flee their homeland over the Himalayas. The photography of Dieter Glogowski and insightful texts by Franz Binder paint a comprehensive picture of the history and the current situation in Tibet. To show readers the treacherous landscapes that many Tibetan children cross when they flee the country, Glogowski accompanied two local children over the 19,000-foot high Nangpala Pass en route to Nepal. His photos present a re-enactment of the dangers involved in this journey.

For millions of people around the world, Tibet is a domain of undisturbed tradition, the Dalai Lama a spiritual guide. By contrast, the Tibet Museum opened in Lhasa by the Chinese in 1999 was designed to reclassify Tibetan objects as cultural relics and the Dalai Lama as obsolete. Suggesting that both these views are suspect, Clare E. Harris argues in *The Museum on the Roof of the World* that for the past one hundred and fifty years, British and Chinese collectors and curators have tried to convert Tibet itself into a museum, an image some Tibetans have begun to contest. This book is a powerful account of the museums created by, for, or on behalf of Tibetans and the nationalist agendas that have played out in them. Harris begins with the British public's first encounter with Tibetan culture in 1854. She then examines the role of imperial collectors and photographers in representations of the region and visits competing museums of Tibet in India and Lhasa. Drawing on fieldwork in Tibetan communities, she also documents the activities of contemporary Tibetan artists as they try to displace the utopian visions of their country prevalent in the West, as well as the negative assessments of their heritage common in China. Illustrated with many previously unpublished images, this book addresses the pressing question of who has the right to represent Tibet in museums and beyond.

This unique book reveals the existence of an advanced civilization where none was known before, presenting an entirely new perspective on the culture and history of Tibet. In his groundbreaking study of an epic period in Tibet few people even knew existed, John Vincent Bellezza details the discovery of an

ancient people on the most desolate reaches of the Tibetan plateau, revolutionizing our ideas about who Tibetans really are. While many associate Tibet with Buddhism, it was also once a land of warriors and chariots, whose burials included megalithic arrays and golden masks. This first Tibetan civilization, known as Zhang Zhung, was a cosmopolitan one with links extending across Eurasia, bringing it in line with many of the major cultural innovations of the Late Bronze Age and Iron Age. Based on decades of research, *The Dawn of Tibet* draws on a rich trove of archaeological, textual, and ethnographic materials collected and analyzed by the author. Bellezza describes the vast network of castles, temples, megaliths, necropolises, and rock art established on the highest and now depopulated part of the Tibetan plateau. He relates literary tales of priests and priestesses, horned deities, and the celestial afterlife to the actual archaeological evidence, providing a fascinating perspective on the origins and development of civilization. The story builds to the present by following the colorful culture of the herders of Upper Tibet, an ancient people whose way of life is endangered by modern development. Tracing Bellezza's epic journeys across lands where few Westerners have ventured, this book provides a compelling window into the most inaccessible reaches of Tibet and a civilization that flourished long before Buddhism took root.

No other land has captured man's imagination quite like Tibet. Hidden away behind the highest mountains on earth, and ruled over by a mysterious God-king, it was for centuries a land forbidden to all outsiders. In this remarkable and ultimately tragic narrative, Peter Hopkirk recounts the forcible opening up of this medieval Buddhist kingdom by inquisitive Western travellers during the nineteenth and twentieth centuries, and the race to reach Lhasa, Tibet's sacred capital. This epic, often harrowing tale, which ends with the Chinese invasion of 1950, draws on a colourful cast of gatecrashers from nine different countries. Among them were adventurous young officers on Great Game missions, explorers and mountaineers, mystics and missionaries. All took their lives in their hands, including three intrepid women. Some were never to return.
