Expectancy: How Long Can Your Engine Last

...

In the 2000-2005 Ford Excursion, the 6.8-liter V10 was good for 310 horsepower and 425 pound-feet of torque.

The V10 was used primarily in applications where Ford truck customers might be looking for a gasoline alternative to a diesel.

Ford is a 10-cylinder engine with five cylinders in each bank. The engine is made of an iron block, whereas the spark plugs are made of aluminum and steel threads. Therefore, due to differences in the expansion rate of the metals when heated, the spark plugs tend to pop out because aluminum expands more than steel.
