movements that have contested it, has concentrated on the West. In this wide-ranging reevaluation, incorporating development studies and political sociology, Maxine Molyneux redresses this balance by analysing Latin American women's movements within liberal, authoritarian and revolutionary states. These studies of Argentina, Nicaragua and Cuba, alongside comparative discussions of socialism, women's movements and citizenship, examine the complex, and persistent, interaction of states and women's movements, and the diversity of responses engendered.

This pathbreaking book provides for the first time an overview of the genesis, growth, gains, and dilemmas of women's movements worldwide. Unlike most of the literature, which focuses on the industrialized Western world, this volume devotes greater attention to the postcolonial states of Asia, Africa, and Latin America. The book challenges the assumptions that feminism can transcend national differences and, conversely, that women's movements are shaped and circumscribed by national levels of development. All the authors reject the notion, proposed by its detractors and champions alike, that feminism is of middle-class origins and Western inspiration. Instead they seek to locate women's movements within the terrain from which they emerge. Virtually all the authors are from the countries or communities about which they write the few exceptions are women who have spent lengthy periods studying and living in the region. Most are scholars, often in women's studies, and many are closely associated with the movements they describe. Thus, these writers share a commitment to the substantive concerns as well as the collective processes of women's movements. As a key book for the Fourth World Conference on Women in Beijing, this volume will be essential reading for anyone interested in the global scope and implications of feminism.

have organized into global movements which have shaped and challenged how international organizations consider gender. It argues that traditional ways of analysing international relations have ignored women's contributions because their tools are gender-exclusive. After developing a gender analysis, this book brings to light many contributions from women's movements especially related to the League of Nations and United Nations, and puts these in the context of changes in the global political economy.

Since the early 1980s Ecuador has experienced a series of events unparalleled in its history. Its &"free market&" strategies exacerbated the debt crisis, and in response new forms of social movement organizing arose among the country&'s poor, including women&'s groups. *Gendered Paradoxes* focuses on women&'s participation in the political and economic restructuring process of the past twenty-five years, showing how in their daily struggle for survival Ecuadorian women have both reinforced and embraced the neoliberal model yet also challenged its exclusionary nature. Drawing on her extensive ethnographic fieldwork and employing an approach combining political economy and cultural politics, Amy Lind charts the growth of several strands of women&'s activism and identifies how they have helped redefine, often in contradictory ways, the real and imagined boundaries of neoliberal development discourse and practice. In her analysis of this ambivalent and &"unfinished&" cultural project of modernity in the Andes, she examines state policies and their effects on women of various social sectors; women&'s community development initiatives and responses to the debt crisis; and the roles played by feminist &"issue networks&" in reshaping national and international policy agendas in Ecuador and in developing a transnationally influenced, locally based feminist movement.

Handbook in 2015 marks the fortieth anniversary of the United Nations International Women's Year, the thirtieth anniversary of the Third World Conference on Women held in Nairobi, the twentieth anniversary of the Beijing Declaration and Platform for Action, and the fifteenth anniversaries of the Millennium Development Goals and of UN Security Council Resolution 1325 on 'women, peace and security'. The editors and contributors critically interrogate transnational feminist movements from a broad spectrum of locations in the global South and North: feminist organizations and networks at all levels (local, national, regional, global and 'glocal'); wider civil society organizations and networks; governmental and multilateral agencies; and academic and research institutions, among others. The handbook reflects candidly on what we have learned about transnational feminist movements. What are the different spaces from which transnational feminisms have operated and in what ways? How have they contributed to our understanding of the myriad formal and informal ways in which gendered power relations define and inform everyday life? To what extent have they destabilized or transformed the global hegemonic systems that constitute patriarchy? From a position of fifty years of knowledge production, activism, working with institutions, and critical reflection, the handbook recognizes that transnational feminist movements form a key epistemic community that can inspire and provide leadership in shaping political spaces and institutions at all levels, and transforming international political economy, development and peace processes. The handbook is organized into ten sections, each beginning with an introduction by the editors. The sections explore the main themes that have emerged from transnational feminist movements: knowledge, theory and praxis; organizing for change; body politics, health and well-being; human rights and human security; economic and social justice; citizenship and statebuilding; militarism and religious fundamentalisms; peace movements, UNSCR 1325 and postconflict rebuilding; feminist political ecology; and digital-age transformations and future
